## Microsite Outline

Link: [The Elder Scrolls IV: Oblivion - Wikipedia](#)

The site should include only the bolded topics:

- **Gameplay**
- **Plot**
- **Development**
  - **Audio\***
- **Marketing and Release**
  - Rating change
- **Additional content**
- **Reception**
- References
- Further Reading
- External Links

I would like the information from the sidebar to be in a table-like format instead of a body of text.

\* I would like the list of songs (under the Audio section) in the soundtrack to also be in a table or list format instead of a body of text.

I would like to include images of gameplay, character design (maybe), and the cover.

There should be a nav bar at the top, but I'm considering making it invisible until hover. I want the experience to be as content-focused as possible with minimal navigational distractions, and without loss of accessibility and ease-of-use.

- maybe a horizontal scrolling nav bar
- Content could move across the page horizontally as you switch to the next topic
